

case study

Maintaining safe, compliant, and efficient facilities is critical for large-scale businesses. For one of the UK's biggest delivery companies, this falls to their Property and Facilities Solutions Provider, managing 2,000+ sites. Our partnership supports this responsibility by delivering essential fire and smoke damper testing and remedial works across their estate.

Our Sales Director, Matt Saunders, has the following to say:

"For more than ten years, we've built a close and reliable working relationship with our client. Our teams know the unique challenges at each site and take real pride in supporting them. The fact that we've been invited back with multiple contract renewals over the years says a lot about the trust we've built together."

WORKING TOGETHER

This leading Property and Facilities Solutions Provider manages and upgrades the estate of a nationwide delivery business. Their work includes ensuring:

- Full compliance with relevant regulations
- Safe and efficient working environments
- Support for ongoing operational needs

Fire safety is a particular priority, and through our expertise, we help them maintain reliable systems across their vast property network.

ABOUT THE CLIENT

We have worked alongside this client for more than a decade, building a trusted partnership that started in 2016, when we first engaged with their Health & Safety Officers. Since then, we have:

- Delivered fire and smoke control damper testing and remedial services across over 75% of their sites, from Scotland down to Milton Keynes.
- Supported their compliance efforts with consistent, nationwide coverage.
- Ensured safety standards are maintained across a diverse and extensive property portfolio.

This long-standing relationship has been strengthened by multiple contract renewals, a testament to the value and reliability of our service and our collaborative approach. We continue to support them in protecting thousands of employees and ensuring their regulatory compliance across the UK.
